## President's Message

The upcoming growing season is approaching, but for now we settle for enjoying plant catalogs. The new varieties of flowers and vegetables certainly catch our attention. We feel safe to try a few because we know the old faithfuls such as our daylilies will emerge from the ground and provide a wealth of beauty this summer. Not only do the catalogs provide us with plant knowledge, but also coming together as a club to share information is an excellent resource.

On a personal note, thank you for providing support to our family the last couple of months. In Nov. Bob and I planted a tulip bed, which we hadn't done in many years. Seeing them bloom this spring will be extra special.

Sue

## Member Slide Show

Our meeting in February will be a member slide show. If you have seedlings that you would like to show us, please let Clarice know at [clariceb@centurytel.net](mailto:clariceb@centurytel.net). We would love to see them and we enjoy seeing what everyone is working on.

Looking forward to seeing you in February.

Clarice

"A weed is a plant that has mastered every survival skill except for learning how to grow in rows."

## **Minutes from CMHS Meeting October 8, 2014**

Vice President Sue McConnell led the meeting. The treasurer's report and previous meeting minutes were accepted as published.

Envelopes were available for renewing memberships. Dues should be submitted before Dec 31.

December party will be Dec. 7, a planning committee was sought but there were no volunteers from the floor.

Nominating Committee (Patti Waterman, Susan Kitchen and Rita Gerke) reported that all current officers are willing to serve again in the coming year. There were no nominations from the floor. Wayne Merrill moved that we accept the nominated slate. Lois Calvin seconded the motion. The motion passed unanimously.

Respectfully submitted, Nancy Rold, Secretary

### **Botany I - Some Wrong Answers:**

Dew is formed on leaves when the sun shines down on them and makes them perspire.

Mushrooms always grow in damp places and so they look like umbrellas.

The pistol of a flower is its only protection against insects.
